ABOUT THE COLLEGE

SCIENT Institute of Technology was established in 2001, under the aegis of SCIENT Educational Society aiming to groom the students in technical education with human values.

Our Vision is to impart quality education in building Engineering and Management professionals striving for a symbiosis of innovative technological excellence, research and human values with global standards to meet skills, knowledge and behavior of industry and societal needs.

We are committed to provide a positive and professional learning environment where all the students are inspired to strive for excellence in becoming competent engineers, technology innovators' and leaders in global market through a cohesive network of parents, students, staff and industry.

ABOUT THE DEPARTMENT

The department of Electrical and Electronics Engineering was established in 2002 with an annual intake of 60 students. The department has well equipped laboratories, highly qualified, experienced and dedicated faculty to full fill aspirations of students and provides excellent facilities for learning. The objective of department is to possess strong educational footing in Science, Mathematics and Electrical Engineering which is essential in making successful careers in Higher Education/ Research/ Industry and will understand the professional responsibility in modern Electrical Power and Energy related Industry through global requirements.

A platform to work on, in near future.

ABOUT THE PROGRAMME

This course considers the design and control of power converters in electric drive vehicles. The course includes an overview of system architectures and covers system-level dynamic modeling and control using MATLAB/Simulink at levels appropriate to determine requirements. Analysis, modeling and design of Switched-mode power converters in electric-drive vehicle systems are covered, including battery DC-DC converters, battery management electronics, motor drive inverters and battery chargers.

RESOURCE PERSONS

Mr.JAYAKRISHNA.M

.

TOPICS TO BE COVERED

, Day-1:Modeling of control systems

Tracking power equations, driving cycle and importance of modeling.

Day-2:

Electric vehicle Architectures and design

Day-3:

Electric motors and power converters for propulsion

Day-4:

Braking of Electric motors and motor efficiency
Day-5:

Case study of electric Vehicle with battery

Technology beyond the Dreams

Course Title: Electric Vehicle Design & Analysis

Course description: This course considers the design and control of power converters in electric drive vehicles. The course includes an overview of system architectures and covers system-level dynamic modeling and control using MATLAB/Simulink at levels appropriate to determine requirements. Analysis, modeling and design of Switched-mode power converters in electric-drive vehicle systems are covered, including battery DC-DC converters, battery management electronics, motor drive inverters and battery chargers.

Course curriculum: Modeling of control systems, Tracking power equations, driving cycle and importance of modeling Electric vehicle Architectures and design

Course Coordinator: MR. B. SREENIVAS

Assessment Procedure: MCQ and Assignment test

Eligibility for Certification: Attendance of 85% and above: Assessment marks more than 60%

Electric Vehicle Design & Analysis

Schedule:

Date and Day	Session-1 (10am to 1:00pm)	1:00pm to 1:45pm	Session-2 (2:00pm to 5:00pm)
Date: 15- 02-2021, Day-1: Modeling of control systems Tracking power equations, driving cycle and importance of modeling (6 Hours)	1. Importance of mathematical modelling 2. Block diagram approach & model-based design for engineering systems 3. Introduction to Simulink environment 4. Creating a simple model 5. Obtaining results		1. Vehicle power requirement calculations: Rolling resistance, air drag, hill climbing and acceleration forces 2. Driving patterns and vehicle testing standards, important terms and definitions related to driving cycle, Energy expenditure calculation
Date: 16- 02-2021, Day-2: Electric vehicle Architectures and design (6 Hours)	1. Different configurations of power train components: Battery Electric Vehicle, Hybrid Electric Vehicle: Series, Parallel and Series-Parallel 2. MATLAB Simulation: Various modelling options, Control strategies 3. Introduction to Hybrid Electric Vehicle using MATLAB and Simulink	LUNCH BREAK	1. Introduction to Control of Electric Vehicle 2. Introduction to Battery Technology for Electric Vehicle
Date: 17- 02-2021, Day-3: Electric motors and power converters for propulsion (6 Hours)	1. Fuel cell and Ultra capacitor for EV using MATLAB & Simulink 2. Analysis & Simulation of Power Converters for EV		1. Understanding power electronics, basic DC converter circuit operation, power devices, switching losses 2. Power electronic control of PMDC, PMBLDC and induction motor
Date: 18- 02-2021, Day-4: Braking of Electric motors and motor efficiency (6Hours)	1. Inverter operation, Sine PWM, Variable frequency control 2. Review of induction motor controller, connections and features, limitations of variable frequency control, introduction to vector Control.		1. Braking requirements of vehicle, Methods of braking of DC & Induction motors: regenerative braking and dynamic braking 2. Coordinating electrical and mechanical brakes, braking control strategies
Date: 19- 02-2021, Day-5: Case study of electric Vehicle with battery (6 Hours)	1. Case study of electric Vehicle with battery		1. Analysis of the project work 2. Feedback about the course

Analysis, modeling and design of switched-mode power converters in electric-drive vehicle systems are covered, including battery DC- DC converters, battery management electronics, motor drive inverters and battery chargers.

Course curriculum

Modeling of control systems, Tracking power equations, driving cycle and importance of modeling Electric vehicle Architectures and design.

Total number of students participated are 34

Outcomes of the course:

The Electrical engineering students are learnt the current technologies and prepared them to do project works.

Under this program, all the students have been qualified and received the certificates during the Academic year 2020-21.

Course Title	IT Essentials: PC Hardware and Software
Course Description	The Internet is changing life as we know it—bringing new economic and social opportunities to communities throughout the world, and increasing the global demand for information and communication technology (ICT) skills. The IT Essentials: PC Hardware and Software curriculum provides an introduction to the computer hardware and software skills needed, to help meet the growing demand for entry-level information and communication technology (ICT) professionals. It is designed for persons who want to pursue careers in ICT, as well as persons who wish to gain practical knowledge of how a computer works.
Course Curriculum	The curriculum covers the fundamentals of PC technology, networking, and security, and also provides an introduction to advanced concepts. IT Essentials: PC Hardware and Software is a hands-on, career-oriented-learning solution with an emphasis on practical experience to help students develop fundamental computer skills, along with essential career skills. The curriculum helps students prepare for entry-level ICT career opportunities and the Comp TIA A+ certification, which helps students differentiate themselves in the marketplace thereby and advance their careers. In addition, the course provides a learning pathway to the CCNA Discovery and CCNA Exploration curricula.
Course Outcomes	Students who complete this course will be able to describe the internal components of a computer, assemble a computer system, install an operating system, and troubleshoot using system tools and diagnostic software. Handson labs and Virtual Laptop and Desktop learning tools help students develop critical thinking and complex problem-solving skills.

ABOUT THE COLLEGE

SCIENT Institute of Technology was established in 2001, under the aegis of SCIENT Educational Society aiming to groom the students in technical education with human values.

Our Vision is to impart quality education in building Engineering and Management professionals striving for a symbiosis of innovative technological excellence, research and human values with global standards to meet skills, knowledge and behavior of industry and societal needs.

We are committed to provide a positive and professional learning environment where all the students are inspired to strive for excellence in becoming competent engineers, technology innovators' and leaders in global market through a cohesive network of parents, students, staff and industry.

ABOUT THE DEPARTMENT

The department of Electrical and Electronics Engineering was established in 2002 with an annual intake of 60 students. The department has well equipped laboratories, highly qualified, experienced and dedicated faculty to full fill aspirations of students and provides excellent facilities for learning. The objective of department is to possess strong educational footing in Science, Mathematics and Electrical Engineering which is essential in making successful careers in Higher Education/ Research/ Industry and will understand the professional responsibility in modern Electrical Power and Energy related Industry through global requirements.

A platform to work on, in near future.

ABOUT THE PROGRAMME

This course covers the essentials of SCADA and PLC systems, which are often used in close association with each other. A selection of case studies is used to illustrate the key concepts with examples of real-world working SCADA and PLC systems| in the water, electrical, and processing industries. This is an excellent opportunity to network with the peers, as well as to gain significant new information and techniques for SCADA or PLC project. There is emphasis made in the course with the practical industry topics highlighting recent developments, using case studies, the latest application of SCADA, PLC technologies, and fundamentals. A generic PLC and uses the open programming IEC 61131-3 standard. It is suitable for students who have no exposure to PLCs, but who expect to become involved in some or all aspects of PLC installation.

It is designed for persons who want to pursue careers in ICT, as well as persons who wish to gain practical knowledge of how a computer works.

Participants who complete IT Essentials: PC Hardware and Software will be able to perform the following functions:

- Select the appropriate computer components to build, repair, or upgrade personal computers.
- Explain how to correctly use tools and safely work in a lab.
- Install components to build, repair, or upgrade personal computers.
- Explain how to perform preventive maintenance and troubleshooting on personal computers.
- Install Windows operation systems.
- Perform management and maintenance of Windows operating systems.
- Configure computers to communicate on a network.
- Configure devices to connect to the Internet and Cloud services.
- Explain how to use, configure, and manage laptops and mobile devices.
- Explain how to configure, secure and troubleshoot mobile, OS X, and Linux operating systems.
- Install and share a printer to meet requirements.
- Implement basic host, data, and network security.
- Explain the roles and responsibilities of the IT professional. Troubleshoot advanced hardware and software problems.

Cisco Networking Academy
Mind Wide Open

IT Essentials: *PC Hardware and Software Version 6.0*

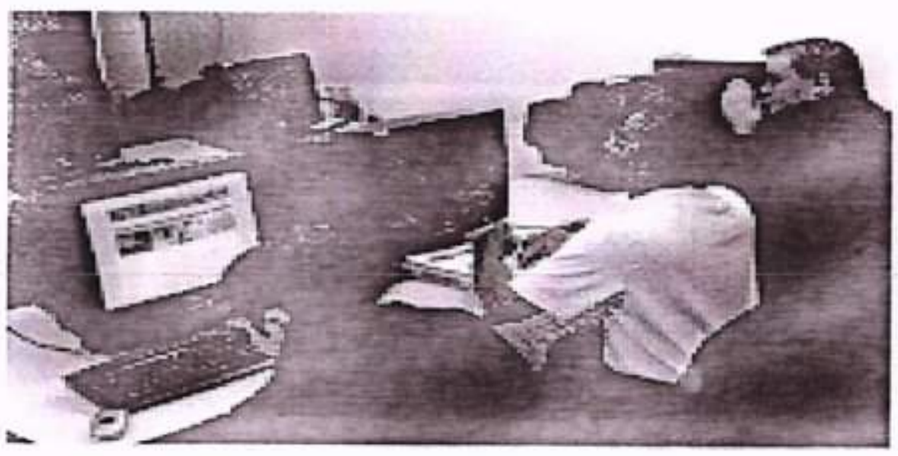
Opportunity

We live in an increasingly connected world, creating a global economy and a growing need for technical skills. Cisco Networking Academy delivers information technology skills to over 500,000 students a year in more than 165 countries worldwide. Networking Academy students have the opportunity to participate in a powerful and consistent learning experience that is supported by high quality, online curricula and assessments, instructor training, hands-on labs, and classroom interaction. This experience ensures the same level of qualifications and skills regardless of where in the world a student is located.

Networking Academy students will become the architects of the networked economy; enabling everyday experiences on the global human network. With the ever-increasing demand for their skills, Networking Academy students have the chance to dream about business-critical positions never before imagined, in industries ranging from medicine and finance to entertainment and aerospace. Networking Academy opens doors to rewarding careers and opportunities for economic advancement and local community development. Students only need to be 'Mind Wide Open' to the possibilities.

Solution

PC Hardware and Software provides a comprehensive overview of computer fundamentals and an introduction to advanced concepts. It is intended for individuals who want to pursue careers in IT and gain practical knowledge of how a computer works.



Students who complete this course will be able to describe the internal components of a computer, assemble a computer system, install an operating system, and troubleshoot using system tools and diagnostic software. They will also be able to connect computers to the Internet and share resources in a networked environment.

PC Hardware and Software will help students prepare for entry-level IT positions within various environments. It will also help students develop greater skills and confidence in working with desktop and laptop computers.

Virtual Learning Tools

Standalone virtual learning tools have been developed to supplement *PC Hardware and Software* classroom instruction and provide opportunities for interactive "hands-on" learning. These tools, the Virtual Desktop and Virtual Laptop, can support course delivery in environments with limited physical equipment by enabling students to virtually disassemble and reassemble desktops and laptops.

PC Hardware and Software Skills

This course provides an excellent introduction to the IT industry and interactive exposure to personal computers, hardware, and operating systems. Students participate in hands-on activities and lab-based learning to become familiar with various hardware and software components and discover best practices in maintenance and safety.

In addition, *PC Hardware and Software* covers the following new topics:

- Laptops and portable devices
- Wireless connectivity
- Security
- Safety and environmental issues
- Communication skills

Industry Recognized Certification

As a CompTIA Authorized Quality Curriculum, *PC Hardware and Software v4.0* will help prepare students for the new CompTIA A+ Essentials and job-skills certification exams. Instructors have the flexibility to teach the course based on any or all of the certification exams.

Students will need to pass two exams to become certified in their chosen career area:

- CompTIA A+ Essentials (220-601)
- Any of the three job-skills exams:
  - 220-602 IT Technician
  - 220-603 Remote Support Technician
  - 220-604 Depot Technician

After becoming certified, students will be qualified to work as computer support professionals and technicians in a variety of work environments and industries.

This course also aligns to the objectives in the first three modules of the European Certification of Informatics Professionals (EUCIP) IT Administrator certification (http://www.eucip.org): Module 1 PC Hardware, Module 2 Operating Systems, and Module 3 Local Area Networks and Network Services.

Course Description

PC Hardware and Software is divided into two sections. The first section provides foundational knowledge that aligns with the CompTIA A+ Essentials exam, while the second section explores advanced concepts in greater depth and provides opportunities for practical application.

Chapters 1–10 cover the following skills and competencies:

- Core competencies in the latest hardware and software technologies
- Information security skills
- Safety and environmental issues
- Soft skills for career development

Chapters 11–16 cover the following skills and competencies:

- Advanced troubleshooting skills
- Prepares for all three CompTIA job environments certification exams
- Advanced installation of computers, peripheral devices, networks and security components

Value Add on course

Industrial Automation with PLC and SCADA

Jointly Organized by

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

Course Title: Industrial Automation with PLC and SCADA

Course description: This course covers the essentials of SCADA and PLC systems, which are often used in close association with each other. A| selection of case studies is used to illustrate the key concepts with examples of real-world working SCADA and PLC systems| in the water, electrical, and processing industries.

This is an excellent opportunity to network with the peers, as well as to gain significant new information and techniques for

SCADA or PLC project. There is emphasis made in the course with the practical industry topics highlighting recent developments, using case studies, the latest application of

SCADA, PLC technologies, and fundamentals.

A generic PLC and uses the open programming IEC 61131-3 standard.

It is suitable for students who have no exposure to PLCs, but | who expect to become involved in some or all aspects of PLC| installation._

Department of Electrical and Electronics Engineering

Value added course on **"Industrial Automation with PLC and SCADA"**

Summary report:

About the course:

This course covers the essentials of SCADA and PLC systems, which are often used in close association with each other. A selection of case studies is used to illustrate the key concepts with examples of real- world working SCADA and PLC systems in the water, electrical, and processing industries.

This is an excellent opportunity to network with the peers, as well as to gain significant new information and techniques for SCADA or PLC project. There is emphasis made in the course with the practical industry topics highlighting recent developments, using case studies, the latest application of SCADA, PLC technologies, and Fundamentals.

A generic PLC and uses the open programming IEC 61131-3 standard.

It is suitable for students who have no exposure to PLCs, but who expect to become involved in some or all aspects of PLC installation.

Course Curriculum:

Industrial Field Instrumentation& Controllers, Programmable Logic Controllers (PLC), PLC Hardware, SCADA /HIMI

Total number of students participated are 76.

Outcomes of the course:

The Electrical engineering students are learnt the current technologies and prepared them to do project works.

Under this program, all the students have been qualified and received the certificates during the Academic year 2020-21.

Report on Skill Development Program conducted by F.A.C.E

Name of the Program: Skill Development Program

Syllabus: Aptitude -quantitative ability, verbal ability and logical reasoning

Objective: To train the students in quantitative and logical skills which are important in analyzing and decision making.

Name of the agency: M/s. Focus Academy for Career Enhancement (FACE).

Duration of the program: Throughout the semesters, for II year students in the year 2020-21.

Outcome: The students improved in their problem solving skills and their ability to comprehend and approach a particular problem also has changed. They also enhanced their verbal ability, quantitative ability and logical reasoning skills. The Sessions were highly interactive and students clarified their doubts for better insights on the topics dealt with.

The undersigned thanked the respective department coordinators and M/s. Focus Academy for Career Enhancement, for their support in completing the program successfully.

Course Title	PHP & MY SQL-SPOKEN TUTORIALS
Course description	PHP is the open-source server-side scripting language used for web development. It is a general-purpose language that helps to create projects like GUIs (Graphical User Interfaces). Many organisations prefer PHP language because it helps to perform system functions, handle forms correctly, access cookies variables, set cookies, and restrict users from accessing specific website pages.It then proceeds to cover topics on web development through an understanding of data storage and handling. MySQL is an open-source database server often used in conjunction with PHP websites
Course Coordinator	Mr. SMD Shafiulla
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	02-12-2020 to 31-12-2020

Course Title	ELECTRIC BIKE DESIGN AND DEVELOPMENT
Course description	The electric-bike market is hotting up: Numerous players are hoping to conquer the road. But pricing and getting suppliers are among the challenges ahead Is there room for 50 players in India's still very nascent electric two-wheeler industry? The answer's certainly no. But that isn't stopping entrepreneurs from driving ahead with their dreams on wheels. Many are young engineers who've designed an engine and see the opportunity to turn it a roadworthy vehicle. Others are corporate players who've spied a market gap that could be filled by CKD kit imports from China assembled here
Course curriculum	Learn Function & History of Motorcycle, Tyre Dynamicsm, Geometric Considerations, Balance & Steering, Aerodynamics, Suspension Principle, Battery & BMS, Motor & Controller, Structural Considerations & Frame Building, Design & Simulation accompanied with various recent case studies to attain the challenges set by the EV industries with Personalized Industry Mentorship, Career Guidance, and Placement Assistance and much more
Course Coordinator	B. Sreenivas , Assistant Professor, EEE
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	02.11.2020 to 14.12.2020
Beneficiaries	B.Tech III YEAR EEE

SYLLABUS:

Introduction

1. **Market study and scope of the project:**

1. Growth in the Electric vehicle market is significant as of 2017 which was the highest recorded sale of EVs reaching 1 million and as per expectation, it will grow up to 125 million by 2030.
2. Many electric two-wheeler start-ups are coming front with their product and two-wheeler are good solutions for congested urban or rural areas.
3. The government of India decided to produce more electric vehicles by 2030 to replace IC-Engine vehicles.
4. The government is also trying to frame a robust network of charging stations all around the county.

2. **Innovation and benchmarking the vehicle during the development cycle:**

1. A complete study of competitor's products for two-wheeler EVs in Indian & overseas for idea generation and conceptualization.
2. Determination of parts/sub-parts functions and integrate them into our concept.
3. Using technologically advanced systems like regenerative braking in a bike.

3. **Specification of the product:**

1.

1. Overall dimension: 2,035 mm x 780 mm x 1,112 mm
2. Wheelbase: 1320 mm
3. Ground clearance:170mm
4. Speed: 80-100 KMPH
5. Motor: BLDC motor,3KW, Cast aluminum rotor
6. Range: 100-120 km/charge
7. Battery- 72V, 40Amp/h Li-ion
8. Kerb weight:200kg,
9. Gross Weight: 450kg,
10. Seat height: 780mm,
11. Seating capacity- 1+1

4. **Development -Concept Modeling (Using CATIA-Dymola):**

1. **CATIA Behavioral Modeling (Dymola)** to determine different parameters for the frame of the bike, factor of safety for the structurally necessary parts, we also tool consideration of vehicle dynamics and Drivability of the vehicle and also some others.
2. All the electrical systems were verified their working and taken note of their working Behavior.
3. All individual systems and sub-systems were checked by to determine the effect on them during real-life situations.

5. **Development -Product Design and development (Using various apps of CATIA):**

1. All systems and sub-systems of bike and components like steering, power train, brakes, suspension, frame, class-A, and others designed based on predefined attributes. The digital model is created using apps Part Design and brought together in Assembly Design.

2. **2D** representation of all the parts with proper dimension was created using **the Sketcher Tool.**
3. **Generative shape design** extensively used to give the bike attractive exteriors and also helped to design some complex parts.
4. Frame was digitally welded using '**Weld design**'
5. **'COST ESTIMATION'** was performed to make the vehicle affordable.
6. All electrical systems were validated and necessary improvements were made to make them more flexible to the situation.
7. All the parts of the bike were assembled using 'Assembly design' with a specified type of connection by physical laws.

6. **Development -Validation of product – (Using SIMULIA):**

1. Structural sustainability analysis for frame, sub-systems like steering system – Axle and suspensions systems are being conducted, as per the results improvements were carried out and get the maximum result.
2. Bike frame was subjected to stiffness, bending, and torsion test to optimize the strength of frame under the condition of a load.

7. **Development- Final representation of the Product – (using CATIA):**

1. "**CATIA Live rendering**" was used to give the digital prototype of Electric Bike an attractive look and color.
2. Digital clone of the Bike was shown during evaluation to the higher authority and their feedbacks were taken into account.
