Course Title	IT Essentials: PC Hardware and Software
Course Description	The Internet is changing life as we know it—bringing new economic and social opportunities to communities throughout the world, and increasing the global demand for information and communication technology (ICT) skills. The IT Essentials: PC Hardware and Software curriculum provides an introduction to the computer hardware and software skills needed, to help meet the growing demand for entry-level information and communication technology (ICT) professionals. It is designed for persons who want to pursue careers in ICT, as well as persons who wish to gain practical knowledge of how a computer works.
Course Curriculum	The curriculum covers the fundamentals of PC technology, networking, and security, and also provides an introduction to advanced concepts. IT Essentials: PC Hardware and Software is a hands-on, career-oriented-learning solution with an emphasis on practical experience to help students develop fundamental computer skills, along with essential career skills. The curriculum helps students prepare for entry-level ICT career opportunities and the Comp TIA A+ certification, which helps students differentiate themselves in the marketplace thereby and advance their careers. In addition, the course provides a learning pathway to the CCNA Discovery and CCNA Exploration curricula.
Course Outcomes	Students who complete this course will be able to describe the internal components of a computer, assemble a computer system, install an operating system, and troubleshoot using system tools and diagnostic software. Handson labs and Virtual Laptop and Desktop learning tools help students develop critical thinking and complex problem-solving skills.

IT Essentials: PC Hardware and Software:

The Internet is changing life as we know it—bringing new economic and social opportunities to communities throughout the world, and increasing the global demand for information and communication technology (ICT) skills. The IT Essentials: PC Hardware and Software curriculum provides an introduction to the computer hardware and software skills needed, to help meet the growing demand for entry-level information and communication technology (ICT) professionals. It is designed for persons who want to pursue careers in ICT, as well as persons who wish to gain practical knowledge of how a computer works.

Participants who complete IT Essentials: PC Hardware and Software will be able to perform the following functions:

- Select the appropriate computer components to build, repair, or upgrade personal computers.
- Explain how to correctly use tools and safely work in a lab.
- Install components to build, repair, or upgrade personal computers.
- Explain how to perform preventive maintenance and troubleshooting on personal computers.
- Install Windows operation systems.
- Perform management and maintenance of Windows operating systems.
- Configure computers to communicate on a network.
- Configure devices to connect to the Internet and Cloud services.
- Explain how to use, configure, and manage laptops and mobile devices.
- Explain how to configure, secure and troubleshoot mobile, OS X, and Linux operating systems.
- Install and share a printer to meet requirements.
- Implement basic host, data, and network security.

Cisco Networking Academy
Mind Wide Open

IT Essentials: *PC Hardware and Software Version 6.0*

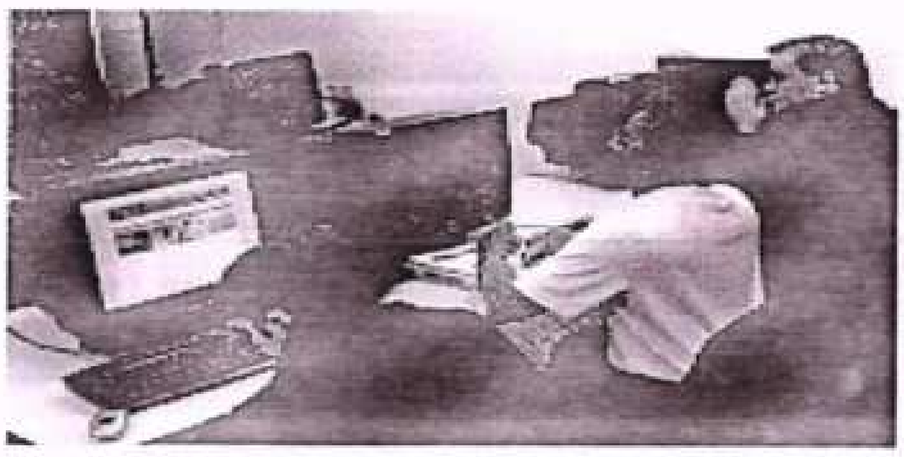
Opportunity

We live in an increasingly connected world, creating a global economy and a growing need for technical skills. Cisco Networking Academy delivers information technology skills to over 500,000 students a year in more than 165 countries worldwide. *Networking Academy* students have the opportunity to participate in a powerful and consistent learning experience that is supported by high quality, online curricula and assessments, instructor training, hands-on labs, and classroom interaction. This experience ensures the same level of qualifications and skills regardless of where in the world a student is located.

Networking Academy students will become the architects of the networked economy, enabling everyday experiences on the global human network. With the ever-increasing demand for their skills, Networking Academy students have the chance to dream about business-critical positions never before imagined, in industries ranging from medicine and finance to entertainment and aerospace. *Networking Academy* opens doors to rewarding careers and opportunities for economic advancement and local community development. Students only need to be 'Mind Wide Open' to the possibilities.

Solution

PC Hardware and Software provides a comprehensive overview of computer fundamentals and an introduction to advanced concepts. It is intended for individuals who want to pursue careers in IT and gain practical knowledge of how a computer works.



Students who complete this course will be able to describe the internal components of a computer, assemble a computer system, install an operating system, and troubleshoot using system tools and diagnostic software. They will also be able to connect computers to the Internet and share resources in a networked environment.

PC Hardware and Software will help students prepare for entry-level IT positions within various environments. It will also help students develop greater skills and confidence in working with desktop and laptop computers.

PC Hardware and Software Skills

This course provides an excellent introduction to the IT industry and interactive exposure to personal computers, hardware, and operating systems. Students participate in hands-on activities and lab-based learning to become familiar with various hardware and software components and discover best practices in maintenance and safety.

In addition, *PC Hardware and Software* covers the following new topics:

- Laptops and portable devices
- Wireless connectivity
- Security
- Safety and environmental issues
- Communication skills

Virtual Learning Tools

Standalone virtual learning tools have been developed to supplement *PC Hardware and Software* classroom instruction and provide opportunities for interactive "hands-on" learning. These tools, the Virtual Desktop and Virtual Laptop, can support course delivery in environments with limited physical equipment by enabling students to virtually disassemble and reassemble desktops and laptops.

Industry Recognized Certification

As a CompTIA Authorized Quality Curriculum, PC Hardware and Software v4.0 will help prepare students for the new CompTIA A+ Essentials and job-skills certification exams. Instructors have the flexibility to teach the course based on any or all of the certification exams.

Students will need to pass two exams to become certified in their chosen career area:

- CompTIA A+ Essentials (220-601)
- Any of the three job-skills exams
  - 220-602 IT Technician
  - 220-603 Remote Support Technician
  - 220-604 Depot Technician

After becoming certified, students will be qualified to work as computer support professionals and technicians in a variety of work environments and industries.

This course also aligns to the objectives in the first three modules of the European Certification of Informatics Professionals (EUCIP) IT Administrator certification (http://www.eucip.org). Module 1 PC Hardware, Module 2 Operating Systems, and Module 3 Local Area Networks and Network Services.

Course Description

PC Hardware and Software is divided into two sections. The first section provides foundational knowledge that aligns with the CompTIA A+ Essentials exam, while the second section explores advanced concepts in greater depth and provides opportunities for practical application.

Chapters 1-10 cover the following skills and competencies:

- Core competencies in the latest hardware and software technologies
- Information security skills
- Safety and environmental issues
- Soft skills for career development

Chapters 11-16 cover the following skills and competencies:

- Advanced troubleshooting skills
- Prepares for all three CompTIA job environments certification exams
- Advanced installation of computers, peripheral devices, networks and security components

ABOUT THE COLLEGE

SCIENT Institute of Technology was established in 2001, under the aegis of SCIENT Educational Society aiming to groom the students in technical education with human values.

Our Vision is to impart quality education in building Engineering and Management professionals striving for a symbiosis of innovative technological excellence, research and human values with global standards to meet skills, knowledge and behavior of industry and societal needs.

We are committed to provide a positive and professional learning environment where all the students are inspired to strive for excellence in becoming competent engineers, technology innovators' and leaders in global market through a cohesive network of parents, students, staff and industry.

ABOUT THE DEPARTMENT

The department of Computer Science Engineering was established in 2001 with an annual intake of 120 students..The departments are well equipped laboratories, highly qualified, experienced and dedicated faculty to full fill aspirations of students and provides excellent facilities for learning.

ABOUT THE PROGRAMME

The Internet is changing life as we know it—bringing new economic and social opportunities to communities throughout the world, and increasing the global demand for information and communication technology (ICT) skills.

ABOUT THE COLLEGE

SCIENT Institute of Technology was established in 2001, under the aegis of SCIENT Educational Society aiming to groom the students in technical education with human values.

Our Vision is to impart quality education in building Engineering and Management professionals striving for a symbiosis of innovative technological excellence, research and human values with global standards to meet skills, knowledge and behavior of industry and societal needs.

We are committed to provide a positive and professional learning environment where all the students are inspired to strive for excellence in becoming competent engineers, technology innovators' and leaders in global market through a cohesive network of parents, students, staff and industry.

ABOUT THE DEPARTMENT

The department of Computer Science Engineering was established in 2001 with an annual intake of 120 students. The department of Electrical and Electronics Engineering was established in 2002 with an annual intake of 60 students. The department of Electronics and Communication Engineering was established in 2002 with an annual intake of 60 students. The departments are well equipped laboratories, highly qualified, experienced and dedicated faculty to full fill aspirations of students and provides excellent facilities for learning

ABOUT THE PROGRAMME

This course provides hands-on training for Primavera P6, leading participants through the entire project life cycle, from planning to execution. Topics include export activities from excel, developing task plan, resource plan, assigning resources, cost estimating and creating a baseline. Different methods of tracking are one of the unique differentiators of this program. The reporting includes building standard, visual and customized reports

Course contents

1. Introduction to Primavera P6
2. Learn about Data, Navigation and
3. Creating a Project/WBS
4. Adding Activities/Relationships/Scheduling/Constraint s
5. Project Documents Library
6. Roles and Resources/ Assigning resources & Costs
7. Analyzing Resources/ Optimizing Plans
8. Base lining the Project Plan
9. Learn about Project Execution and Control
10. Reporting Project Performance

Primavera Systems Inc. launched primavera in 1983 which was acquired by Oracle Corporation in 2008. Oracle Primavera P6 is the world's most popular robust and ease-to-use software application for managing Projects, Programmers, and Portfolio's. It is a browser-based solution comprising role-specific functionality to satisfy each stakeholder's needs responsibilities and skills. It provides a single solution for successfully managing projects of all sizes, complexity and duration. Primavera has evolved into a fully featured Enterprise Project Portfolio Management solution providing world class

functionality for project-based organizations, encompassing; Planning & Scheduling, Portfolio Management, Resource management, Risk & Issue Management, Reporting & Business Intelligence & Team Collaboration. This course provides hands-on training for Primavera P6, leading participants through the entire project life cycle, from planning to execution. ABOUT THE COLLEGE

SCIENT Institute of Technology was established in 2001, under the aegis of SCIENT Educational Society aiming to groom the students in technical education with human values.

Our Vision is to impart quality education in building Engineering and Management professionals striving for a symbiosis of innovative technological excellence, research and human values with global standards to meet skills, knowledge and behavior of industry and societal needs.

We are committed to provide a positive and professional learning environment where all the students are inspired to strive for excellence in becoming competent engineers, technology innovators' and leaders in global market through a cohesive network of parents, students, staff and industry.

ABOUT THE DEPARTMENT

The department of Computer Science Engineering was established in 2001 with an annual intake of 120 students. The department of Electrical and Electronics Engineering was established in 2002 with an annual intake of 60 students. The department of Electronics and Communication Engineering was established in 2002 with an annual intake of 60 students. The departments are well equipped laboratories, highly qualified, experienced and dedicated faculty to full fill aspirations of students and provides excellent facilities for learning

ABOUT THE PROGRAMME

This course provides hands-on training for Primavera P6, leading participants through the entire project life cycle, from planning to execution. Topics include export activities from excel, developing task plan, resource plan, assigning resources, cost estimating and creating a baseline. Different methods of tracking are one of the unique differentiators of this program. The reporting includes building standard, visual and customized reports

Course contents

1. Introduction to Primavera P6
2. Learn about Data, Navigation and
3. Creating a Project/WBS
4. Adding Activities/Relationships/Scheduling/Constraint s
5. Project Documents Library
6. Roles and Resources/ Assigning resources & Costs
7. Analyzing Resources/ Optimizing Plans
8. Base lining the Project Plan
9. Learn about Project Execution and Control
10. Reporting Project Performance

functionality for project-based organizations, encompassing; Planning & Scheduling, Portfolio Management, Resource management, Risk & Issue Management, Reporting & Business Intelligence & Team Collaboration. This course provides hands-on training for Primavera P6, leading participants through the entire project life cycle, from planning to execution. Topics include export activities from excel, developing task plan, resource plan, assigning resources, cost estimating and creating a baseline. Different methods of tracking are one of the unique differentiators of this program. The reporting includes building standard, visual and customized reports.

Students of III and IV year Computer Science Engineering , SCIENT Institute of Technology have attended the program and faculty members of SCIENT have attended the training program.

The Students of Computer Science Engineering were active in successful completion of five days training program.

Value added course on 'Intellectual Property Rights Theory and Practice'

Summary report:

About the course:

The WIPO Academy is the center of excellence for intellectual property (IP) education and training. The Academy helps to build human capacity in IP, which is essential to innovation. The WIPO Academy has been offering distance learning (DL) courses, covering all aspects of intellectual property (IP), to both professionals and students to increase the awareness among them.

Course Curriculum:

General IPR Awareness about Patent, Design, Trademark, Copyrights, Geographical Indicators, Industrial Design and Trade Secrets, logical thinking, and reasoning, IPR story-based case studies, Reasoning and general knowledge on science and technology.

Total number of students participated is 34.

Outcomes of the course;

The Electrical engineering students are learnt the current technologies and prepared them to do project works.

Under this program, all the students have been qualified and received the certificates during the Academic year 2021-22.

A Report

On

Five Day Training Session on e-Yantra- Embedded Systems &Robotics

A 5-day training session has conducted by e-Yantra Lab team members on 3th Feb 2022 and 7th Feb 2022 in Scient Engineering College for students on Embedded System & Robotics, under eYantra — a project in the Department of Computer Science and Engineering, Indian Institute of Technology Bombay - is a flagship project of MHRD through the National Mission on Education through ICT (NMEICT)

The training session was fortunate to have participation from different branches (Five Students from each team) of SCIENT. Teams of participants from each branch were provided a robotic kit, Firebird V, and accessories, for hands on. The training covers introduction to the Firebird V robot, introduction to AVR microcontroller and programming environment, simple motion control using I/O ports, robot velocity control using pulse width modulation, sensor interfacing, interrupt programming, closed loop position control of robot using position encoders. At the end of the hands on, teams have completed the projects on line following robot, obstacles avoiding navigation etc,

ABOUT THE COLLEGE

SCIENT Institute of Technology was established in 2001, under the aegis of SCIENT Educational Society aiming to groom the students in technical education with human values.

Our Vision is to impart quality education in building Engineering and Management professionals striving for a symbiosis of innovative technological excellence, research and human values with global standards to meet skills, knowledge and behavior of industry and societal needs.

We are committed to provide a positive and professional learning environment where all the students are inspired to strive for excellence in becoming competent engineers, technology innovators' and leaders in global market through a cohesive network of parents, students, staff and industry.

ABOUT THE DEPARTMENT

The department of Computer Science Engineering was established in 2001 with an annual intake of 120 students. The department of Electrical and Electronics Engineering was established in 2002 with an annual intake of 60 students. The department of Electronics and Communication Engineering was established in 2002 with an annual intake of 60 students. The departments are well equipped laboratories, highly qualified, experienced and dedicated faculty to full fill aspirations of students and provides excellent facilities for learning.

ABOUT THE PROGRAMME

e-Yantra _Project is an initiative by 11T Bombay that aims to create the next generation of embedded systems engineers with a practical outlook to help provide practical solutions to some of the real world problems. The Ministry of Human Resource Development (MHRD) sponsors E-Yantra under the National Mission for ICT in Education (NMEICT) program.

As part of an initiative, a training sessions on "e-Yantra

Embedded Systems & Robotics" is being conducted by Matrusri Engineering College, Saidabad, Hyderabad for inhouse student from all branches

Broad Topics to be covered :

- Introduction to Fire Bird V robot.
- Introduction to AVR Micro-controller and Programming environment, Robot velocity control using pulse width modulation.
- Introduction to LCD interfacing
- Analog sensor interfacing using Analog to Digital conversion.
- Interrupt programming,Closed loop position control of robot using position encoders.
- Interfacing with white line sensors & IR sensor, Line follower Lab Session on Atmega 2560

Benefit of the programme :

Awareness of embedded systems, robotics technology and mechatronics

It provides platform to design, develop, program and test of robots to various applications.

Students can participate in national and international robotics competitions.

Improve BE projects with help of e-Yantra open source community.

Exposure to job opportunities in robotics-

Encourage to use robots to solve real life problems

RESOURCE PERSONS

Mrs. B. Sukanya
Mr. T. Hari Krishna

ELIGIBILITY

This workshop is open to all B.Tech and M.Tech students of Electrical and Electronics and allied areas of Engineering branches approved by AICTE and professionals from R&D Organizations.

Course Title	CPA: Programming Essentials in C++
Course description	As one of the most popular programming languages, C++ is hailed for its efficiency and its ease for developing games, real-time systems, and applications with graphical libraries. Take the course to learn the basics of programming in the C++ language, and the fundamental notions and techniques it uses. C++ knowledge lends itself well for landing jobs in Security, Networking and IoT fields. Don't miss out. This first course, in the 2-course series, introduces you to the basics then progressively extends your capabilities.
Course curriculum	• Learn the syntax, semantics, and basic data type of C++. • Understand principles of the object-oriented model. • Implement and write in C++ and resolve typical implementation challenges via language libraries. • Prepare for the C++ Certified Associate Programmer Certification (CPA).
Course outcomes	Students who complete the course will be able to accomplish coding tasks related to the basics of programming in the C++ language, and to understand and utilize the fundamental notions and techniques used in the language.
Course Coordinator	**Mr. SMD Shafiulla**
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%

COURSE SYLLABUS

C++ Essentials 1 (CPPEI)

Module 0: Installing And Using Your Programming Environment

- Introduction to IDE;
- Online tools;
- Edube Interactive.

- CPPEI-Module 1: Absolute Basics - Introduction to Computer Programming
  - languages: natural and artificial;
  - machine languages:
  - high-level programming languages, obtaining the machine code: compilation process;
  - variables;
  - integer values in real life and in C++; integer literals:
  - characters;
  - comments,
  - the basics of flow control;
  - dealing with streams and basic I/O operations;

CPPEI-Module 2writing simple programs.

- Advanced flow control and data aggregates
- how to control the flow of the program;
- more data types;
- conditional instructions: if, else, switch;
- loops and controlling the loop execution;
- logic, bitwise and arithmetic operators;
- vectors, multidimensional arrays; declaring and initializing structures.
- CPPEI-Module 3: Extending expressive power: pointers, functions, and memory
- designing, declaring, and invoking functions,
- pointers;
- different methods of passing parameters and their purpose;
- default parameters;
- inline functions;
- overloaded functions;
- sorting,
- memory on demand.

CPPEI-Module 4: Accessing various data types

- arrays of pointers;

- conversions;
- strings: declarations, initializations, assignments;
- strings as an example of objects: (methods and properties)
- using and declaring namespaces,
- destine with excentinos

CPPEI: end of Part 1

- Part Summary Test (Score 70% or more to unlock Part 2.) C++ Essentials 2 (CPPE2)

CPPE2-Module 1: The essentials of Object-Oriented Programming

- Basic concepts of OOP: A stack: the procedural approach vs. the OOP approach;
- The anatomy of the class;
- Static components;
- Objects vs. pointers and objects inside objects.

CPPE2-Module 2: Inheritance

- Class hierarchies;
- Classes, inheritance, and type compatibility;
- Polymorphism and virtual methods,
- Objects as parameters, and dynamic casting;
- Various supplements; The const keyword:
- Friendship in the C++ world.

CPPE2-Module 3: Exceptions

- Introduction to exceptions; The throw statement;
- Categorizing exceptions;
- Catching exceptions:
- Exceptions in action.

CPPE2-Module 4: Operators and enumerated types

- Overloading operators;
- Enumerated types. of Part 2

CPPE2-End

- CPPE2: Part 2 Summary Test (Score 70% or more to unlock the Final Test)
- C++ Essentials Final Test (Score 70% or more to uube eligible for the CPA exam discount code.)

CPA: Programming Essentials in C++

During the Cisco Networking Academy course, administered by the undersigned instructor, the student has studied the following skills:

- the universal concepts of computer programming.
- developer tools
- the syntax and semantics of the C++ language, as well as basic data types in the C++ language
- the principles of the object-oriented model and its implementation in the C++ language
- the means by which to resolve typical implementation problems with the aid of standard C++ language libraries
- the writing of C++ prograles using standard language infrastructure, regardless of the hardware or software platform

The statement of Achievement is to acknowledge that during the course CPA Programming Essentials in C++, the student has been able to accomplish coding tasks related to the basics of programming in the C language, and understands the fundamental notions and techniques used in object-oriented programming.

By completing the course, the student is now ready t the qualification CPA - C++ Certified Associan Programmer Certification, from the C++ Institute.

Value add on course

Robotics & IOT

Jointly organized by

Department of Electrical and Electronics Engineering

Course Title	Robotics & IOT
Course description	This workshop offers a neat introduction on the "Ti- Robotic Kit and Internet of Things' and is based on the advanced development tools from Texas Instruments. The TM4C123GH6PM and the CC3100 Booster pack offer a complete Wi-Fi IOT solution while the integration of Energia with the IOT platform simplifies the IOT
Course curriculum	application development. Basics of TI Processors and its architectures including fundamentals of various, protocols -Design and implementation of RSLK kit to construct a ROBOT.
Course Coordinator	B. Srinivas
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	01.03.2022 to 05.03.2022
Beneficiaries	B.Tech III yr

Value added course on 'Robotics & IOT'

Summary report

About the course:

To learn the latest trends technology and internet of things IOT, UART, Communication Protocols, MQTT protocol and Texas instruments TSLC kit to design and construct a ROBOT.

Course curriculum:

Basics of TI Processors and its architectures including fundamentals of various, protocols - Design and implementation of RSLK kit to construct a ROBOT.

The number of students participated is 64.

Outcomes of the course:

The basics of TI processes and its architectures, protocols are learnt and implemented. The RSLK Texas instrument kit to construct a ROBOT using UART module with a wireless communication device is also learnt. The participants also simulated and studied various protocols including configuration of IOT bundles as publisher to implement MQTT protocol.

Value added course on 'Robotics & IOT'

Summary report

About the course:

To learn the latest trends technology and internet of things IOT, UART, Communication Protocols, MQTT protocol and Texas instruments TSLC kit to design and construct a ROBOT.

Course curriculum:

Basics of TI Processors and its architectures including fundamentals of various, protocols - Design and implementation of RSLK kit to construct a ROBOT.

The number of students participated is 97.

Outcomes of the course:

The basics of TI processes and its architectures, protocols are learnt and implemented. The RSLK Texas instrument kit to construct a ROBOT using UART module with a wireless communication device is also learnt. The participants also simulated and studied various protocols including configuration of IOT bundles as publisher to implement MQTT protocol.

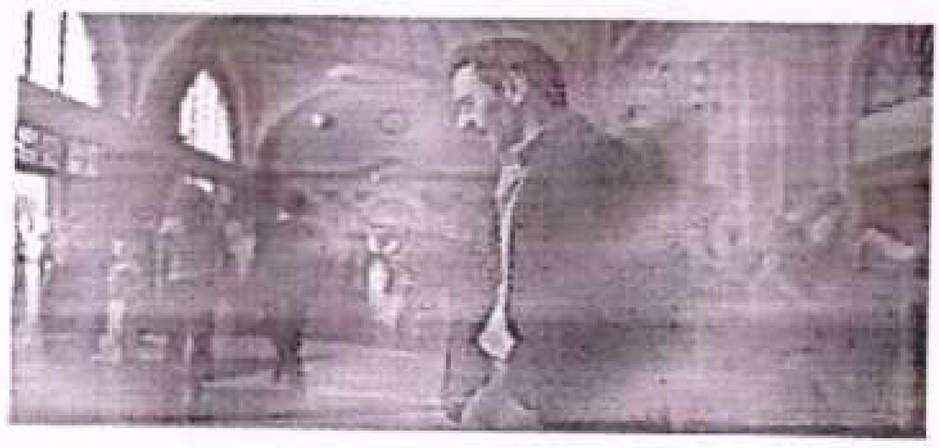
Networking Today

Networks in Our Daily Lives

- Welcome to a world where we are more powerful together, than we ever could be apart.
- Welcome to the human network.



Networking Today

Technology Then and Now

- We live in a world we barely imagined 20 years ago.
- What wouldn't we have without the Internet?
- What will be possible in the future using the network as the platform?

Networking Today

No Boundaries

- Advancements in networking technologies are helping create a world without boundaries.
- The immediate nature of communications over the Internet encourages global communities.
- Cisco refers to the impact of the Internet and networks on people the "human network".

Networks Support the Way We Learn

- Do you remember sitting in a classroom like this
- You don't have to be in school anymore to take a class You don't have to be in a classroom to have a teacher

CCNA1: Introduction to Networks

This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, participants will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes.

Participants who complete Introduction to Networks will be able to perform the following functions:

- Understand and describe the devices and services used to support communications in data networks and the Internet
- Understand and describe the role of protocol layers in data networks
- Understand and describe the importance of addressing and naming schemes at various layers of data networks in IPv4 and IPv6 environments
- Design, calculate, and apply subnet masks and addresses to fulfill given requirements in IPv4 and IPv6 networks
- Explain fundamental Ethernet concepts such as media, services, and operations
- Build a simple Ethernet network using routers and switches
- Use Cisco command-line interface (CLI) commands to perform basic router and switch configurations

CCNA3: Scaling Networks

This course describes the architecture, components, and operations of routers and switches in larger and more complex networks. Participants learn how to configure routers and switches for advanced functionality. By the end of this course, participants will be able to configure and troubleshoot routers and switches and resolve common issues with OSPF, EIGRP, and STP in both IPv4 and IPv6 networks. Participants will also develop the knowledge and skills needed to implement a WLAN in a small-to-medium network.

Participants who complete the Scaling Networks course will be able to perform the following functions:

Understand, configure and troubleshoot enhanced switching technologies such as VLANs, Rapid Spanning Tree Protocol (RSTP), Per VLAN Spanning Tree Plus Protocol (PVST+), and EtherChannel

Understand, configure, and troubleshoot first hop redundancy protocols (HSRP) in a switched network

Understand, configure, and troubleshoot wireless routers and wireless clients

Configure and troubleshoot routers in a complex routed IPv4 or IPv6 network using single-area OSPF, multiarea OSPF, and Enhanced Interior Gateway Routing Protocol (EIGRP)

Manage Cisco IOS® Software licensing and configuration files

CCNA2: Routing and Switching Essentials

This course describes the architecture, components, and operations of routers and switches in a small network. Participants learn how to configure a router and a switch for basic functionality. By the end of this course, participants will be able to configure and troubleshoot routers and switches and resolve common issues with RIPVI, RIPVI, single area and multi-area OSPF. virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks.

Participants who complete the Routing and Switching Essentials course will be able to perform the following functions:

- Understand and describe basic switching concepts and the operation of Cisco switches
- Understand and describe the purpose, nature, and operations of a router, routing tables. and the route lookup process
- Understand and describe how VLANs create logically separate networks and how routing occurs between them
- Understand and describe dynamic routing protocols, distance vector routing protocols. and link-state routing protocols
- Configure and troubleshoot static routing and default routing (RIP and RIPng)
- Configure and troubleshoot an Open Shortest Path First (OSPF) network
- Understand, configure, and troubleshoot Dynamic Host Configuration Protocol (DHCP) for IPv4 and IPv6 networks
- Understand, configure, and troubleshoot Network Address Translation (NAT) operations Cisco Academy Membership Agreement

- Determine how a router will forward traffic based on the contents of a routing table.
- Explain how switching operates in a small to medium-sized business network.
- Use monitoring tools and network management protocols to troubleshoot data networks.
- Configure monitoring tools available for small to medium- sized business networks.
- Configure initial settings on a network device.
- Configure Ethernet switch ports.
- Implement VLANS.
- Implement static routing and RIPV2.

Implement DHCP on a router.

- Implement network address translation (NAT).
- Implement access control lists (ACLS) to filter traffic.

Course Title	C-Spoken Tutorial
Course description	C is a procedural programming language. It was initially developed by Dennis Ritchie as a system programming language to write an operating system. The main features of C language include low-level access to memory, simple set of keywords, and a clean style, these features make C language suitable for system programming like operating system or compiler development.
Course curriculum	Basics, Variable Declaration, Definition and Scope, Data types, Storage ,lasses, Input/Output, Operators, Preprocessor, Array & Strings, Control Statements, Functions, Pointers, Enum, Struct and Union, Memory Management, File Handling
Course Coordinator	B. Sreenivas , Assistant Professor, EEE
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	02.11.2021 to 14.12.2021

Course Title	Database Design and Programming with SQL
Course description	This Course engages students to analyze complex business scenarios and create a data model - a conceptual representation of an organization's information. Participants implement their database design by creating a physical database using SQL. Basic SQL syntax and the rules for constructing valid SQL statements are reviewed. This course culminates with a project that challenges students to design, implement, and demonstrate a database solution for a business or organization.
Course curriculum	Introduction, Entities and Attributes, Relationship basics, Super/Sub Types, Normalization, Mapping, Programming with SQL, Select and Where, Joins, Group Functions.
Course Coordinator	Mr. SMD Shafiulla
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	8-7-2021 to 29-12-2021

Syllabus for Database Design and Programming with SQL

This course engages students to analyze complex business scenarios and create a data model-a conceptual representation of an organization's information. Participants implement their database design by creating a physical database using SQL. Basic SQL syntax and the rules for constructing valid SQL statements are reviewed. This course culminates with a project that challenges students to design, implement, and demonstrate a database solution for a business or organization.

Participants who complete Database Design and Programming with SQL will be able to perform the following functions.

- Understand Concept of Entities and Attributes, Entity relationship Modelling and ERDS.
- Understand Super /Sub Types and Business Rules.
- Understand Relationship Fundamentals, Normalization.
- Understand the basics of Ares, Hierarchies and Recursive modelling. Mapping.

Design, Creating and Presenting Database Projects.

- Introduction to Programming with SQL.
- Use basic SQL commands like Select and Where, Order by and Introduction to Functions.
- Practice of Joins, Group Functions, Sub Queries, DDL and DML Commands, Sequences and Synonyms, Privileges and Regular Expressions.

Course Title	Data Science with Python
Course description	Python is open source, interpreted, high level language and provides great approach for object-oriented programming. It is one of the best language used by data scientist for various data science projects/application. Python provide great functionality to deal with mathematics, statistics and scientific function. It provides great libraries to deals with data science application.
Course curriculum	This comprehensive course will be your guide to learning how to use the power of Python to analyze data, create beautiful visualizations, and use powerful machine learning algorithms!
Course Coordinator	Mr. SMD Shafiulla
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	8-7-2021 to 5-11-2021
Beneficiaries	B.Tech III YEAR CSE-A&B

Course Title	SKILL SET TRAINING PROGRAM ON MATLAB/ SIMULINK
Course description	In this course the usual pattern of teaching/learning MATLAB from a programming view point to a mathematical one. The idea is that by thinking about mathematical problems, students are prodded into learning MATLAB for the purpose of solving the problem at hand. The down-side to this approach is that it is somewhat based on the idea that people are already excited about mathematics, or can be excited about it
Course curriculum	Variables, arrays, conditional statements, loops, functions, and plots are covered in a project-based style where much of the learning happens away from the classroom. Students are expected to spend about 4 hours per week on homework. At the end of the course, students should be able to use MATLAB in their own work, and be prepared to deepen their MATLAB programming skills
Course Coordinator	B. Sreenivas , Assistant Professor, EEE
Assessment Procedure	MCQ
Eligibility for Certification	Attendance of 85% and above: Assessment marks more than 60%
Dates	02.11.2021 to 14.12.2021
Beneficiaries	B.Tech IV YEAR EEE

SYLLABUS:

Introduction

- Basic of MATLAB
- Types of Window
- Types of File
- Basic Operations

Matrix (Array Design)

- Matrix Operation
- Array Design
- Array Operation
- Multidimensional Array

Graphics

- Plotting
- Multiple Plot
- 2-D Plot
- 3-d Plot
- Subplot
- Handle Graphics
- Animation
- Example(like a project)

Symbolic Calculation

- Symbols
- Design Formula
- Differentiation
- Integration
- Solve Equation
- Example(like a project)

Publishing Report

- Publishing Report
- Design HtmlFile,Pdf,Word,PPT
- Import Export
- Example(like a project)

Operators

- Arithmetic Operator
- Logical
- Relational

Branch and Loop

- If statement
- If-else statement

PRINCIPAL

- Else-if statement
- Pause,Break,Continue,Switch-case,try-catch,Return Statement
- For Loop,While Loop
- Example(like a project)

Script and Function

- Script Design
- Function Design
- Types Of Function
- Example(like a project)

GUI (Graphical User Interface)

- Introduction Of GUI
- GUI Function Property
- GUI Component Design
- GUI Container
- Writing the code of GUI Callback
- Dialog Box
- Menu Designing
